ROBERTO CAVALLI: *"I wanted a boat that Batman would drive"*

Risking it all in the WILD WEST OF SUPERYACHTING

HURRICANE HEALING: *why the Caribbean is back in business*

"My next boat has to be 110 metres" **ON BOARD WITH JOHN CAUDWELL**

Port and starboard side decks fold out to become stairwells into the water

A winter garden lounge surrounded by sliding glass walls

A raised pool aft with a spa underneath

THE DRAWING BOARD

These boundary-pushing concepts are in the offing

BOLD BLAZON

Bannenberg & Rowell and Kusch Yachts have unveiled their latest concept for a “bold and unconventional” superyacht. The 118m Project Blazon will accommodate 32 guests, and a crew of 44. See above for its stand-out features. bannenbergandrowell.com

OASIS 80 UNVEILED

This unusual 24m three deck concept from Lazzara Ombres Architects is a catamaran at the bow but a support vessel at the stern. As a result, the Oasis 80 hybrid concept has room for 10 guests across five cabins and is likely to stand out to those who love watersports. The yacht can house an 8.5m tender, four jet skis, a Jetlev-Flyer, four paddleboards and four Seabobs. It also comes with an optional package of a top deck slide and climbing wall. loayachts.com

HERE COMES THE SUN

Solar energy has taken centre stage in two new superyacht designs. The first oceangoing solar powered yacht unveiled by Solar Impact Yacht is kitted out with systems that rely on the sun as their primary power source and has a 300m² solar surface. A back-up diesel system, meanwhile, ensures the 23.9m yacht can operate in periods of cloud

cover. But this might be considered cheating by the standards of the Silent 79 Cruiser from Silent Yachts. The 24m yacht, which is under construction, is 100 per cent solar powered via extensive flybridge panelling, resulting in an unlimited range, and is noise and fume-free. solarimpact-yacht.com; silent-yachts.com
