

Dear Friends of Silent Yachting,

As the producer of the world's first and only oceangoing solar-electric production catamarans we embarked on an exciting journey - right into the future. And we are grateful that you share our ideas of new style of yachting - clean, noiseless, eco-friendly with unlimited range.

The boat fair at Düsseldorf was a big success, a lot of requests, several clients fly to Thailand in the next weeks to spend a week on our demonstrator Silent 55 there and even more customers arranged seatrials with our new boat during next summer in the Mediterranean.

If you want to experience "silent cruising" on a SILENT Yacht, we would like to invite you to see and to test one of our demonstrator yachts in Nassau / Bahamas, Thailand or in the Mediterranean.

To get a first impression of our SILENT Yachts, we offer you a 360° panorama walk - you find it [here \(SILENT 55\)](#) and [here \(SILENT 80\)](#).
If you have any questions, we always remain at your disposal.

We are looking forward to your feedback and to welcoming you on board one of our SILENT Yachts.

Michael, Heike and the SILENT-YACHTS-Team

If you want to receive more information about our SILENT-YACHTS charter possibilities, please contact our sales team.
