Specifications & Options
Create an independent and environmentally friendly yachting experience which combines the silent cruising of a sailboat with the luxury of a motor yacht.
Embrace the sound of silence
Preserve the purity of the ocean
Experience unprecedented levels of tranquility and pleasure
Marking the beginning of a range of fully electric tenders, the SILENT Tender 400 perfectly complements the experience on board of our solar powered catamarans. Following the same philosophy as our yachts, it was developed with a strong focus on being lightweight and highly efficient. The rigid and durable Carbon Fibre hull is surrounded by a stripe of rubber coating.

This does not only protect the hull during day-to-day use, it also resembles the signature window stripe on our yachts in terms of its design.
