Born out of a unique collaboration, the SILENT VisionF 82 features the best qualities of an electric as well as a power catamaran. With state of the art battery banks, a large solar array and a hybrid propulsion system, this yacht truly combines the best of both worlds.

Her hull and superstructure are made entirely from aluminum. This natural raw material does not only provide the benefit of a long lifespan, it can also be fully recycled and re-used. As a result, these properties lead to high levels of value retention for the future.
